

Bio Plastics Gloves

AnEco Compostable Gloves

Made entirely from compostable materials, safe for user's health and environmentally friendly. Materials are soft, tough, strong, without water leaking, serving customer's different needs. Capable of decomposing into plant humus, water and CO₂ in the natural environment by "being eaten" by soil microorganisms after 6 months to 1 year. Useful for organic and inorganic waste containing, suitable for families and restaurants, hotels, etc.
